Registration: 5:30 p.m.

Lecture: 6 – 8 p.m.

art & experience[®] The Art of Seeing the Invisible

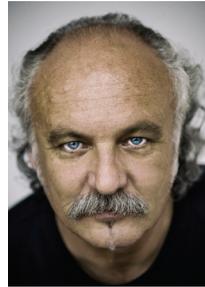

We should not lose individuality and emotion in our work; originality and creativity are essential. We must continue to observe the visual aspects of internal and external tooth structure and use our talents and knowledge to replicate nature.

World renowned dental artist, technician and photographer Mr. Claude Sieber will be lecturing on several areas of the dental experience.

Lecture Learning Objectives

The primary determinants of natural tooth esthetics

- Methods to incorporate these determinants into restorations
- The VITA VM Material and its application
- Options and possibilities of re-creating nature
- Clinical cases
- Various aspects of intra-oral dental photography

Claude Sieber

Claude Sieber began his career by completing his studies in Art. During the early 1970's he earned his professional certification from the government of Switzerland, completing his apprenticeship in a small dental laboratory in Basel. Over the next years, he worked for several dental laboratories gaining additional work experience. His practicum took him as far as Rio de Janeiro, Brazil, where he worked at length with Professor Olympio Pinto, perfecting his style of natural tooth simulation. Claude Sieber has been the owner of a specialized dental laboratory in Basel Switzerland since 1984 and in 1990 he dedicated a training facility to the advancement of Expert Dental Ceramists. He is working for dentists worldwide and focuses special interest on interior tooth replacement. Claude has lectured extensively throughout the world and his original work in the fine arts and photography are prominent in his visual and physical presentations. Claude Sieber was instrumental in the development of VITA's SPINELL[®] porcelain, VITADUR[®] Alpha, AKZENT[®] stains, INTERNO[®] color effects, OMEGA 900[®] porcelain systems, the 3D-MASTER[®] color shade guide and the new VM material.
